– Guided Excursion to Doñana – Visit on boat and 4x4 visit

Price: from 42,63€/person

Departure from the hotel at 09:30 am.

The visit leaves from the Bajo de Guía beach, in Sanlúcar de Barrameda (Cádiz) crossing the Guadalquivir river to Doñana Park in a traditional barge.

Once in the shore of the National Park, the visitor starts the tour in 4x4 vehicles (30Km aprox.) visiting the different ecosystems of the heart of Doñana: its immense beach, the famous mobile dunes of white sands, the leafy pine groves that form the preserves, the Vera, which marks the border between the forest and the marsh, an area of frequent influx of the park's own fauna; And finally the endless plain of the marsh, a place that in winter houses thousands of water birds from central and northern Europe.

We finish the tour in La Plancha, an old village of huts where the inhabitants of Doñana lived. During the navigation, about 30 minutes, the visitor receives information about the river, its banks, its origins, its fauna, etc., until returning to the point of departure in Sanlúcar.

Back to the hotel at 13:00 pm.

The "Museum of Watches" began its collection in 1972, after an exhibition of pieces from the Convent of the Capuchin Fathers which had been inherited by the testamentary legate of the Countess of Gavia (from the Castle of San Marcos, in the Port of Santa Maria). In this way a set of 152 clocks was acquired with which this museum was started, inaugurating the 20 of March of 1973.
